

Mohammed Siddiq

AI/ML Engineer • NLP & MLOps • Enterprise Systems

MohammedSiddiq1235@gmail.com | 7674901203 | Hyderabad, India | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

AI/ML Engineer with a B.Tech in Artificial Intelligence & Machine Learning, currently driving enterprise-grade system reliability at Tech Mahindra for a US-based client. Brings hands-on experience across the full ML lifecycle, from NLP pipelines and transformer fine-tuning to RAG system design, MLOps tooling, and production integration. Track record of shipping working solutions independently: reduced LMS user engagement drops by 30% via intelligent content personalization, and grew client acquisition 40% through a full-stack product built solo. Seeking impactful roles at the intersection of AI research and production systems.

EXPERIENCE

Systems & Technical Operations Engineer | Tech Mahindra Aug 2025 – Present • Hyderabad, India
US-Based Enterprise Client Engagement

- Owned full incident lifecycle for production enterprise systems, triaging failures, isolating root causes, and documenting resolutions to achieve minimal downtime and meet client SLAs.
- Leveraged SQL to query operational datasets, generate compliance reports, and detect data integrity discrepancies across integrated system components.
- Validated end-to-end event-triggered workflows across networked components, tracing and resolving integration failures; effectively functioning as an integration QA layer.
- Maintained audit-ready documentation covering configuration changes, incident logs, and resolution records aligned with client data security requirements.
- Managed version-controlled documentation and config files via GitHub, using feature branches for isolated testing and PRs for team review prior to rollout.

Machine Learning Intern | Ignitus Feb 2024 – May 2024 • Remote

- Built supervised ML models (Logistic Regression, Decision Trees, Naive Bayes) and NLP pipelines (TF-IDF, tokenization, text classification) deployed into a production LMS, contributing to a 30% improvement in user engagement metrics.
- Integrated Hugging Face transformer models for adaptive content personalization, enabling context-aware recommendations for learners at different proficiency levels.
- Collaborated across a fully remote team via GitHub, managing feature branches, raising pull requests, and conducting peer code reviews throughout the project lifecycle.

Web Developer (Freelance) | Excel Placement Services Jan 2024 – Present • Hyderabad, India

- Designed and deployed a full-stack responsive website end-to-end, covering requirements gathering, UI development, hosting, and DNS configuration, driving a 40% increase in client acquisition inquiries.
- Translated non-technical stakeholder requirements into functional specifications and delivered iteratively based on feedback, maintaining a tight feedback loop throughout the engagement.

PROJECTS

Natural Language Question Answering System

- Built a Flask-based REST API enabling users to query unstructured PDF documents via transformer-powered NLP. Handled full ownership from model selection and API design to backend integration and deployment documentation.

Tech Stack: Python • Flask • Hugging Face Transformers • REST API • Git

RAG-Powered Multi-Document QA System

- Engineered an end-to-end Retrieval-Augmented Generation pipeline with multi-format document ingestion (PDF, DOCX, TXT), semantic vector storage via ChromaDB, and advanced retrieval strategies (MMR + MultiQueryRetriever), delivering cited, cross-document synthesised answers at scale using LLaMA 3.3 70B via Groq API with full source attribution and strategy-switching CLI.

Tech Stack: Python • LangChain • ChromaDB • HuggingFace Sentence Transformers • Groq API • LLaMA 3.3 70B

TECHNICAL SKILLS

Languages & Scripting: Python, SQL

AI / ML: Supervised & Unsupervised Learning, NLP, Deep Learning, Generative AI, LLMs, RAG Pipelines, Vector Embeddings, Prompt Engineering, Attention Mechanisms, Transfer Learning

Data Structures & Algorithms: Arrays, Linked Lists, Binary Search Trees, Sorting, Recursion, Dynamic Programming

Libraries & Frameworks: Scikit-Learn, TensorFlow, Keras, Hugging Face Transformers, LangChain, NLTK, Pandas, NumPy, Matplotlib, Flask

MLOps & DevOps: MLflow, DVC, Docker, GitHub Actions, CI/CD Pipelines

Tools & Platforms: Git/GitHub, Hugging Face Hub, ChromaDB, Salesforce, VS Code

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning

2020 – 2024

Siddhartha Institute of Technology and Science, JNTUH

- Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Data Structures & Algorithms, Database Management Systems, Computer Networks

CERTIFICATIONS

- Machine Learning Training – Internshala
- Deep Learning with TensorFlow – IBM
- Machine Learning with Python – freeCodeCamp
- Responsive Web Design – freeCodeCamp

ACHIEVEMENTS & HIGHLIGHTS

- 850+ GitHub contributions across open-source and personal projects demonstrating a consistent, documented engineering practice.
- 50+ downloads on a self-published VS Code theme, shipped end-to-end independently from development to marketplace listing.
- 50% measurable increase in professional outreach driven by a personal portfolio website built from scratch.
